Nairobi:

Temperatures in Kibera, Mukuru and Mathare are routinely several degrees higher than the central monitoring station – indicating the existence of micro-heat islands in informal settlements

Tips for a Successful Partnership:

- Clearly define purpose, vision and interim milestones
- Develop and refine a concise, inspiring ‘pitch’
- Establish communication processes - regular meetings, frequency, attendees
- Identify delegated roles and responsibilities. Ensure partners have complimentary skills.
- Outline decision making procedures. Promptly deal with disputes in the most informal way possible.
- Clarify branding strategies
- Start small and grow over time.
- Remember basic improv skills – listen, build on each others ideas & make your partner look good...
